Commission on the Status of Women Sixty-eighth session New York, 11-22 March 2024

Item 3 (a) of the provisional agenda\* Follow-up to the Fourth World Conference on Women and to the twenty-third special session of the General Assembly, entitled "Women 2000; gender equality, development and peace for the twenty-first century": implementation of

strategic objectives and action in critical areas of concern and further actions and initiatives

Accelerating the achievement of gender equality and the

empowerment of all women and girls by addressing poverty and strengthening institutions and financing with a gender perspective

Report of the Secretary-General

the control of the submitting office.

Summarv

The present report provides an analysis of women's poverty in the context of intersecting crises and of the financing and institutional arrangements required to advance towards the full, effective and accelerated implementation of the Beijing Declaration and Platform for Action and the gender-responsive implementation of the 2030 Agenda for Sustainable Development (General Assembly resolution 70/1). It concludes with recommendations for consideration by the Commission on the Status

\* F/CN 6/2024/1

of Women.

#### O Something to think about...

For a better comprehension let's disassemble 1. Achievement of gender equality: Ensuring

equal rights, responsibilities, and opportunities for all genders, eliminating discrimination and hias in all aspects of life

Increasing the capacity of women and girls to make choices and transform those choices into desired actions and outcomes, gaining control over their own lives. 2. Addressing poverty: Implementing

strategies and policies to reduce or eliminate the economic, social, and environmental factors that contribute to poverty. a) strength institutions: Enhancing the effectiveness, transparency, and accountability of organizations and systems to better serve communities and promote sustainable development

b) finance with a gender perspective: Integrating gender considerations into equitable access to resources and opportunities for all genders.

#### I. Introduction

In accordance with its multi-year programme of work (2021–2024), the Commission
on the Status of Women will consider "Accelerating the achievement of gender equality
and the empowerment of all women and girls by addressing poverty and strengthening
institutions and financing with a gender perspective" as its priority theme at its sixtyeighth session in 2024.

- 2. Over the past several years, the world has faced intersecting crises and shocks. The combined impact of the coronavirus disease (COVID-19) pandemic, sepopolitical tensions and war, unsustainable levels of sovereign debt and the cost-of-living crisis has pushed people into poverty. Concurrently, the acceleration and internitification of climate change, biodiversity loss and environmental degradation are deepening poverty and inequality.
- 3. Women experience higher poverty rates than men, and the gender-poverty gap is projected to persist into the mid-century. See current food and energy crisis disciproprioritiestly placet somens, as the global guided gap in medical to severe food disciproprioritiestly placed at 2.4 per centage points in 2.22cc days and property stood at 2.4 per centage points in 2.22cc days and a consideration of the c
- 4. As women and girls contend with the impact of climate change and other criess, they are often forced to move or migrate within and beyond their countries of pilic. It is estimated that women and girls comprise half of internally displaced or stateless persons worldwised. Verone and girls cromprise half of internally displaced or stateless expenses worldwised. Verone and girls using a humanitarian and ragials content and ragial content and ragial content and read to the content of the conten
- 5. The economic and social impacts of those crises are not inevitable. Long-standing deficiencies within the international financial system have become more visible in the current polycrisis. 6 Developing countries face higher borrowing costs and high debt payments, which limit the fixed space to respond effectively in a crisis. In 2022 alone, most of the world's poorest countries saw debt service payments. In 2022 alone, most of the world's poorest countries saw debt service payments.
- . Inequality between and within countries is both a driver and consequence of crisis. It creates a vicious cycle that erodes the potential for a decent quality of life, with negative impacts on the goodest and most vulnerable countries and people.

#### 7. It is possible to make policy choices aimed at accelerating progress towards ending poverty and achieving inclusive, sustainable development for all.

Accomplishing those goals requires investment in a comprehensive set of economic and social policies aimed at driving women's full economic participation, supported by gender-responsive, accountable institutions. An additional \$360 billion per year is needed to achieve gender equality across key Sustainable Development Goals. including ending poverty and hunger.9

8. The Secretary-General has called for a Sustainable Development Goal stimulus to rapidly scale up financing to accelerate progress towards the Goals. The stimulus requires action in three areas: tackling the high cost of debt and risk of debt distress; massively increasing affordable and long-term financing issued by multilateral development banks; and expanding contingency financing. By mobilizing resources equitably and targeting investments and policies towards ending women's and girls' poverty, it is possible to move towards a new development paradism centred on care for people and the planet

#### II Normative frameworks

9. In the preamble of the Convention on the Elimination of All Forms of Discrimination Against Women, the States Parties express their concern that "in situations of poverty, women have the least access to food, health, education, training and opportunities for employment and other needs" and their conviction that "the establishment of the new international economic order based on equity and justice will contribute significantly towards the promotion of equality between men and women"

10. In the Beijing Platform for Action, it is underscored that women's poverty is related to the absence of economic opportunities, lack of access to economic resources, education and support services and low levels of participation in decisionmaking. Emphasis is also placed on the need for resources to achieve the strategic objectives under each critical area of concern. In reviews of the implementation of the Platform for Action, insufficient budget allocations for gender equality have been identified as a harrier across all 12 critical areas of concern (E/CN 6/2015/3)

11. In Transforming our world: the 2030 Agenda for Sustainable Development (resolution 70/1), ending poverty is recognized as the greatest global challenge and as indispensable to the achievement of sustainable development. Through Goal 1. Member States commit to ending poverty in all its forms and dimensions by 2030, including by reducing by at least half the proportion of women, men, boys and girls living in poverty. The Goal also addresses the need to ensure significant mobilization of resources from a variety of sources so developing countries can implement programmes and policies to end poverty in all its dimensions.

In the Addis Ababa Action Agenda of the Third International Conference on Financing for Development (resolution 69/313), the financing framework for the 2030 Agenda, achieving gender equality and the realization of women's human rights is recognized as essential for inclusive, equitable economic growth and sustainable development. The need is reiterated for gender mainstreaming in the formulation and implementation of all financial economic environmental and social policies including through targeted actions and investments. Since the adoption of the Addis

# Something to think about...

It is important to understand how the high cost of debt and debt distress impacts the goal of empowering women and girls, Many developing countries face high debt burdens. limiting their ability to invest in essential services such as education, healthcare, and social protection. If debt servicing costs can be reduced, governments can redirect resources toward programs that promote sustainable development and address inequalities, for example, by allocating more funds to programs economic participation. High debt often leads disproportionately impact women due to cuts in public services and job losses in femaledominated sectors, Additionally, women disproportionately rely on social protection. programs, which are often underfunded in highly indebted countries.

<sup>\*</sup> United Nations Conference on Trade and Development (UNCTAD), "The costs of achieving the SDGs: Gender equality "

Ababa Action Agenda, the financing for development follow-up process has produced agreed outcomes addressing the importance of scaling up investment in gender equality, including through accelerated implementation of gender-responsive budgeting (E/FDF/2023/3).

13. In 2022, the Conference of the Parties to the United Nations Framework Convention on Climate Change adopted decision 24/E/C.7, in which the Parties and relevant public and private entities were encouraged to "strengthen the genderresponsiveness of climate finance with a view to further building the capacity of women... and in order to facilitate simplified access to climate finance for graze and local communities."

14. An evolving normative framework or uppair care and domestic work has energed over the past several years. The Commission on the Tatas or Women has recognised the increased demand for impair care work strong from the intersecting work in the parameter increased demand for impair care work strong in the many care for the parameter work in the pandentic response. In 2021, the General Assorbing by passed resolution 77/137, in which it proclaimed 90 October as the International Day of Care and Support, Actionalizing the inter the of care in sockey and highlying the need to the parameter of th

#### III. Women's and girls' poverty

education and the labour market.

15. Progress towards ending poverty needs to be 26 times faster to achieve Goal 1 by 2030.10 It is projected that \$75 million people may still be living in extreme poverty in 2030.11 Currently, 10.3 per cent of women are living in extreme poverty. 12 It current trends continue, an estimated 8 per cent of women worldwide (342 million) will still be living on less than \$2.15 a day in 2030,13 most of them is sub-Sabarra Africa.14

16. Women and gifts living in poverty experience multiple and compounding deprevations, including by being deviced a document and/ord of living, flood security, nutrition and adequate housing. Those deprivations are intensified by other dimensions of inequality, including reset, enthericly, ideality, location, marrial and migrant status. HTV status, sexual orientation and geoder identity, 15 Momentain grant status. HTV status, sexual orientation and geoder identity, 15 Momentain grant and additionation and provided in the control of the status of international more life for the control of the control of international more life for the control of the contr

17. Poestry is a consequence of systemic failures that lead to exclusion and discrimination, violating civil, cultural, occommic, environmental, political and social rights (AHRC/S3/19). Women's and girld powerly is shaped by structural discrimination, pervasive norms and extreotypes embedded in institutional structures. Gender norms and bias intersect with economic deprivation to constrain, or severely limit, women and eight 'access to land,' properly, health care and family planning.

# 14 Something to think about...

What are the primary objectives of the Commission on the Status of Women? How does the CSW contribute to advancing gender equality globally? What are some successful policies and programs that have been implemented as a result of CSW recommendations?

\$8% of all women murdered in 2017 were killed by an intimate partner or a family member (UNODC, 2018). Women are more at risk of sexual violence, exploitation, and trafficking during war. 71% of all human trafficking involves women and girls – mainly for sexual exploitation (UNODC, 2016).

Ginette Azzona and Antra Bhart, "Investigation," A commission of the Commission o

18. Women's and girls' poverty rates shift across the life course. At higher poverty thresholds, adolescent girls often fare worse than adolescent boys. Contributing factors include high fertility rates, single motherhood and early age at marriage, 17 Women ages 25 to 34 are 1.2 times more likely to live in extreme poverty than men owing to their predominant role in providing care. The gender gap continues into older age: in 2023. Riner cent of women ages 55 to 59 were living in extreme noverty. compared to 6.9 per cent of men.18 The higher likelihood of career interruptions, parttime employment, lower earnings, concentration in the informal sector and more time spent on unpaid care work accrues over time, resulting in older women having fewer assets, savings and social protection benefits.19

19. Households with children are among the poorest, and single parents, predominantly single mothers with children, face a higher risk of poverty.20 in 80 per cent of 59 low- and middle-income countries analysed in 2020, more women than men lived in slums, where they faced limited access to housing, clean water and sanitation.21 By 2050, an estimated 70 per cent of the world's female population will live in urban areas, and, if current trends continue, one third will reside in slums or informal settlements 22

20. Care work sustains economies and societies but is commonly undervalued and unrecognized. Women, on average, spend 2.8 hours per day more than men performing unpaid care and domestic work.23 The predominant role of women in unpaid care is a key contributor to their greater propensity to poverty (A/68/293). Unpaid care and domestic work are particularly challenging for women living in poverty, who often have limited access to critical time-saving infrastructure such as water, sanitation and electricity, 24 In some countries, a gendered division of labour in

the household can significantly increase care work and further deplete women's and girls' resources. According to research from four countries conducted from 2015 to 2017, women from low-income families who undertook paid and unpaid care work experienced emotional and physical depletion, working long days and suffering injuries with no time for rest. 25

21. Women living in poverty are time- and income poor. Studies from several countries indicate that the rate of time poverty is higher among employed women than employed men in both income-poor and non-income-poor households.26 In countries with inadequate social and physical infrastructure, the rate of time poverty is likely much higher

Something to think about...

Did you know that the gendered division of labor can be a cultural belief? In fact, despite its wide ratification, some countries have made reservations about certain provisions of CEDAW particularly those related to family law and the roles of men and women which they see as conflicting with their cultural or

22. Lack of access to decent work and economic resources is an important driver of women's poverty. Labour markets often reproduce gender inequalities.27 Globally, 61.4 per cent of women ages 25 to 54 were engaged in the labour force in 2022, compared with 90.6 per cent of men in the same age range,28 and the gender gap in employment has persisted for two decades 29 In 2019, for each dollar men earned in labour income. women earned only 51 cents: in low- and lower-middle-income countries however women earned 33 cents and 29 cents on the dollar, respectively,30 Employment gaps. occupational segregation and the higher likelihood of part-time employment increase

23. Increasing female labour force participation is often seen as a prerequisite for gender equitable, inclusive growth, Economies are not automatically inclusive. however, and active employment does not always guarantee women a decent standard of living. In fact, economic inclusion can be harmful to women living in poverty if it is forced, precarious, segregated or impoverished (i.e. when earnings are too low for women to rise above noverty levels) 31

24. In several regions, women are overrepresented in the informal economy, often working in the most insecure, precarious jobs with little to no protection. The share of women in informal employment exceeds that of men in 55.5 per cent of countries. and this is particularly common in low- and lower-middle-income countries.32 The informal economy is characterized by low remuneration, poor working conditions and limited access to social protection and rights at work. Women in informal employment face a double penalty, receiving on average lower wages than workers in the formal economy and lower wages than men in general.33

25. Financial exclusion and lack of access to financial services also intensify women's poverty. Data on financial inclusion in developing economies show that 74 per cent of men have a bank account, compared to 68 per cent of women, as the gap that had stood at 9 percentage points for several years has narrowed 34 In lowand middle-income countries, women are 28 per cent less likely than men to own a mobile money account 35 Furthermore, women-owned and women-led enterprises are confronted with major barriers to accessing financing, including exclusion from financial institutions or insufficient acress to financial services. At the height of the COVID-19 pandemic, women-owned micro-, small and medium-sized enterprises had 70 per cent of their trade finance applications totally or partially rejected 36 Globally, women-owned businesses were 5.9 percentage points more likely to have experienced temporary business closures during COVID-19 lockdowns than

inequalities", World Bank blogs, 8 September 2020.

# Something to think about...

What is an informal economy? The informal economy refers to economic activities and jobs that are not regulated taxed, or protected by the government. These can include street vending, unregistered businesses, casual labor, or unpaid work. Workers in the informal economy often lack formal contracts, job security, and access to benefits like healthcare or social protections.

7/18

Women with informal microbusinesses face even greater barriers in accessing

financing and financial services and are more vulnerable to economic shocks 26. Limited access to social protection prevents women living in poverty from enjoying a decent standard of living. In 2021, 4.1 billion people (53.1 per cent of the world's population) continued to lack any form of social protection 38 Women are overrepresented among those who remain excluded, and gender-specific vulnerabilities are still not evenly addressed in social protection systems. 39 In response to the COVID-19 pandemic, over 3,000 social protection and labour market measures were adopted in 226 countries and territories to mitigate the associated socioeconomic fallout. However, women's economic security was targeted in only 12 per cent of those measures, and support for rising unpaid care demands was only provided under 7 per cent of measures.40

27. Gender-differentiated impacts of climate change and environmental degradation range from higher levels of child marriage in arid zones and reduced access to clean water - which increases time burdens on women and girls, who are primarily responsible for water collection globally.41 These impacts are compounded by

women's unequal access to land, natural resources and other assets, which limits their ability to build resilience to climate and environmental crises and disasters 28. Women and girls in low-income households may have limited or no access to

sexual and reproductive health care and services, including comprehensive sexuality education. The associated increase in the likelihood of unintended pregnancies and limited access to skilled birth attendance contribute to a higher risk of illness or death from pregnancy or childbirth.42

29. Even as global and regional aggregates for education completion have reached or neared parity through the upper secondary level, gender gaps still exist. In 2023. 129 million girls and young women may have been out of school 43 and girls living in noverty, especially those from noor rural areas or marginalized groups, were among the most excluded 44 The consequences of such exclusion can further limit economic opportunities and deepen poverty.

30. Systemic bias embedded in the economic and social structures of society expose women living in poverty to a disproportionately high risk of violence.45 Poverty increases the risk factors for intimate partner violence, including reduced educational and employment opportunities and increased household stress. In turn, violence heightens women's risk of poverty and economic hardship because of the associated

sexual harassment at work, violence at home or violence on the streets are unable to participate on an equal basis in the labour market, which translates into limited or no access to contributory social security benefits and a higher likelihood of experiencing poverty, violence and homelessness in old age (A/HRC/53/39).

#### IV. Financing and institutional challenges

31. Ending women's powerty requires financing from all sources aimed at enhancing women's economic empowement through decent work, accessible public services, social protection and sustainable infrastructure. Effective institutions that can design gender-responsive, pro-poor laws and policies, mobilize and spend rescures and be accountable to women living in poverty are needed. Fixcal space for such investments is predicated on a conductive global and national financial system.

32. There is significant asymmetry in the global financial safety net, with eveloping countries taking limited scores to, and allocations of, resources that promote economic safety and security in times of crisis. Only a small share of special drawing rights has been allocated to developing countries. Africe, showe to more than 60 per cent of the world's extreme poor, received only 5.2 per cent of the battert of the world's extreme poor, received only 5.2 per cent of the battert poor received only 6.2 per cent of the battert poor received only 6.2 per cent of the battert poor received only 6.2 per cent of the battert poor received only 6.2 per cent of the battert poor received only 6.2 per cent of the battert poor received only 6.2 per cent of the battert poor received only 6.2 per cent of the battert poor received only 6.2 per cent of the battert poor received for the form of the form of the battert poor received for the form of the form of the battert poor received for the form of t

33. High levels of debt distress severely constrain countries" fiscal space. In 2023, the 52 low- and middle-income economies that account for more than 40 per cent of the world's poorest people were either in or at high risk of debt distress,48 In lower- and middle-income countries, debt serving places an enormous strain on essential social spending. Currently, 48 countries, home to 3.3 billion people, are directly affected by undernivestment in education or health owing to large interest payment burdens. 49

34. Most Climate finance attributable to developed countries is currently provided in the form of gains. In 2020, 5446. Million (71 per cent) of public climate finance was channelled through concessional and non-concessional loans, while grants amounted to just 177. 9 fillion (12 per cent). 30 The burden of loan repayment shifts the responsibility for climate finance onto developing countries, despite the fact that countries should be after the primary responsibility for contributing climate finance, 51.

35. Conditions for debt relief programmes have tended to promote fiscal consolidation goldicies, including cuts to public spending on education, health care, pension schemes and public sector employment. Furthermore, in many countries, such programmes have relied on the introduction of regressive value added taxes or service fees for users. 52 In 2022, it was estimated that 85 per cent of the world's population would be living under austerly measures by 2023.53 Fixed acconditions.

#### 35 Something to think about...

What is debt distress? According to AWS Debt distress occurs when a country's debt levels and other internal and external factors put it in danger of not meeting its debt obligations. For more information read this article <u>Debt Distress and crisis</u>

#### 35 Something to think about...

What are loans and how do they work? According to the Cambridge dictionary, a loan is an amount of money that is borrowed, often from a bank, and has to be paid back, usually together with an extra amount of money that you have to pay as a charge for borrowing.

# 35 Something to think about... Fiscal consolidation can have mixed effects on

efforts to empower women and girls, depending on how it is implemented. For example, if a government attempts to reduce its budget deficit and debt level by reducing funding for education, healthcare, childcare, and welfare programs this would disproportionately affect women and girls, who rely more on these services. Whener, who often dominate the job market in teaching and following the programs of the progra

jobs as a result of spending cuts in these areas...

Harmful Social Heforms in 2022–25 (Initiative for Policy Dialogue and others, 2022).

measures often affect programmes and services that are particularly important for women living in poverty. As households absorb the shock from cuts to social spending and public services, women's unpaid labour becomes an invisible subsidy to the economy.54

36. Global tax regimes have affected the fiscal space available to low and middle income countries for crisis response and poverty eradication. High levels of illicit financial flows, including corporate tax evazion, avoidance and abuse, criain vital tax revenues and deepen poverty and enegatily. Recent research indicates that are estimated 30 per cent of multinational profits are shifted to tax lawsen globally. If a shifted profits are to be a self-acted to be her so are Countries, domestic profits in a different profit or the countries. The self-acted profits in contries, domestic profits in the countries.

37. Domestic public resources continue to be the primary source of financing for public goods and services and for reducing inequality through redistribution.56 Debt management and servicing, tax policy and the availability of other sources of financing affect the fiscal space available for investments in policies and programmes aimed at addressing women's and girls' poverty.57

38. Yax composition has shifted over the past several decades as exemptions, credits and tax breaks have been expanded, corporate income and capital income taxes have decaying the control of the con

actors, including institutional investors, pension funds, insurance companies and sovereign wealth funds, are becoming more active in sustainable finance, demanding greater transparency on the impact that investments have on people, communities and

soveregy weam runds, are becoming more active in sustainable finance, demanding greater transparency on the impact that investments have on people, communities and the planet. Challenges in mobilizing and deploying private finance to promote gender equality include limited awareness, technical expertise and product involvation aimed at effectively linking gender and finance, coupled with a lack of harmonized standards and guidelines on private financing for gender equality.

41. Economic institutions that are representative and diverse can drive pro-poor, inclusive and gender-responsive economic policies. Women's participation in these institutions is exsential to combat gender bias and tenerotypes in both policymaking and policy outcome. However, women are often not represented in the leadership of ministries of finance and central banks. Of the 190 member countries of the International Monerary Fund, women server as finance ministers in 26 and as central bank governors in only 17. (The average proportion of women serving as cabinet ministers globally in generality) in 190 members.

42. Ministries of finance determine the scope and direction of national fiscal policy, leaveware, they often have limited capacity to analyse the gender impact of palapolicy, actual policy, including taxation and spending. In addition, such ministries are the least likely to have gender equality specialist available in robuse and tent of bane the lowest presence of women overall. Similarly, central banks are dominated by men and prevent many women from reaching ideaceth pic lose in common growing prevent many women from reaching ideaceth pic lose in concennic policymaking.

- 43. To channel resources effectively to policies and programmes in critical areas, including decent wire, social protection and public services, countries need comprehensive, transparent and finable public financial management systems, the public public financial management systems, comprehensive systems for tracking resources allocated to gooden equality and women's empowerment.65 Without robust systems, countries cannot estimate costs and allocate and spone resources to implement gender responsive, pro-poor laws and and allocate and spone resources to implement gender responsive, pro-poor laws and services.
- 44. National mechanisms for gender equality and the empowerment of women and girls are important institutional actors that coordinate cross-sectoral policy development. They can transform public policy values and the responsiveness of public institutions. Their effectiveness is often limited, however, as they are underresourced and lack political authority.
- 45. Corruption weakens the efficiency and effectiveness of the public sector by reducing the resources available to address poverty and advance sustainable development. While all of society can be affected by corruption, women living in goverty are disproportionately affected given their reliance on public services.66

46. Significant gaps in financing for women's organizations, including local feminist and grass-roots organizations and collectives. Unit their active engagement in strengthening accountability and demanding action for women living in poverty. Organizations that advocate for women's rights received only 0.13 per cent of total

In the biggest electoral year in history, 113 countries have never had a woman Head of State, new UN Women data shows (In the biggest electroal year in history, 113 countries have never had a woman Head of State, new UN Women data shows) Poster: Women political leaders 2024 (Poster: Women political leaders 2024 | Publications)

### 45 Something to think about...

Corruption in the allocation of social services and benefits can disproportionately harm women, who are often the primary caregivers and rely more on these services. This can lead to inadequate support for childcare, food assistance, and other critical services.

### 46 Did you know that...

Corruption can undermine the effectiveness of international aid and development programs aimed at promoting gender equality. When funds intended for women's empowerment are misappropriated, the intended benefits do not reach the target populations, stalling progress on gender equality coals

ODA. Women's rights grants accounted for only 0.42 per cent of grants from progressive private foundations in the United States of America 67 A'Eearth of sex-disaggregated poverty data is a major constraint for policymakers and gender equality advocates. Only 42 per cent of countries with recent official statistics on income poverty have data disaggregated by sex. Even where data are disaddredated. Jarde dender dans are evident. Amond countries producing multidimensional poverty indicators, only 20 per cent disaggregated those indicators

by sex or by the sex of the head of household.68 V. Strengthening financing and institutions with a view to ending women's and girls' poverty

> 48. The international financial architecture is currently undergoing important changes. As debt burdens hamper the ability of governments to reduce inequality and invest in essential services, concrete steps must be taken towards a debt workout mechanism to address sovereign debt restructuring processes. Such steps need to ensure that debt resolution is timely, orderly, effective, fair and negotiated in good faith, Furthermore, debt sustainability assessments and debt restructuring approaches need to address financing needs, including available fiscal space, and give priority to spending on domestic needs and services to reach those furthest behind. In addition, restructuring methods need to avoid both insufficient debt relief and regressive taxation and measures that curtail public spending on essential services, which have disproportionate impacts on women living in poverty.

49. The international financial system needs to scale up concessional and non-concessional long-term financing for investments in sustainable development policies that address women's poverty. Public development banks need to be strengthened and supported in their efforts to provide financing aligned with public aims, as their longer-term horizons and more stable funding sources enable them to take on more risk 69 Furthermore, lending by multilateral development banks should be on a longer-term horizon, with a cost of borrowing set below market rate, and the Multilateral development banks should also establish facilities to receive special

drawing rights with a view to leveraging them to support greater volumes of longterm development financing, and countries with strong external positions should rechannel a portion of their unused special drawing rights to such facilities.71 50. Gender-responsive economic policies can support more inclusive and equitable growth, create jobs for women and men and contribute to achieving gender equality. The design of fiscal policy needs to be grounded in an understanding of gender

inequalities, especially those faced by women living in poverty. Metrics that move beyond gross domestic product can support the measurement of valuable contributions to economic and social well-being including uppaid care work 72 Taken together, such metrics will support the design and implementation of policies aimed at reducing and redistributing women's unpaid care and domestic work, opening

Something to think about...

Look for examples of public development banks and how they affect women empowerment policies. What about multilateral development banks?

Did you know that...

Effective fiscal policies need to account for the specific challenges faced by women, especially those living in poverty. This includes understanding how taxation, public spending. and social protection measures impact women differently and designing interventions that can reduce gender disparities. Tax policies should be designed to avoid disproportionately burdening women, who often earn less and have less economic nower than men Progressive tax systems and exemptions or credits for low-income earners can help alleviate these burdens and promote equity.

- avenues for decent employment and ensuring the provision of high-quality, accessible and affordable public services.
- 51. To mobilize domestic public resources equitably, Governments need to shift the tax composition towards progressivity by increasing corporate taxation through the introduction of wealth taxes, taxes on dividends and capital gains taxes while simultaneously reducing regressive taxes, including consumption taxes.73
- 52. It is important to consider the ways in which current and proposed taxation measures affect informal workers. A first step is to conduct gender analysis to assess existing sources of taxation and the sex-disagglegation of earnings within the informal economy. It is equally important to ensure that any taxes and fees paid by informal workers are not excessive and that they generate goods and services in
- 53. Resource mobilization must command public trust and be based on the principles of openness, transparency and equitable treatment, which may include tostering more equitable representation of women within tax administrations and active engagement of people, including women living in poverty, in tax-related decisions, Research indicates that compolance and tax morals are a highly expenses.

workers' organizations are involved with the collection of taxes.74

- 5.4. Revenue raised through progressive taxes must be spent on support for genderresponsive policies and opportunes. The region is gender analysis in antibotal and local budgistary processes is extented to tendine governments to estimate coats, and the control of the contro
- 55. For growth to be gender-equitable, it must ensure decent work for both women and men, giving priority to women living in poverty. Training and opportunities for women to enter middle- and high-skilled occupations are also required, but the value of the contributions of women in occupations such as care work also needs to be reassessed with a view to increasing wages and improving conditions. These measures are particularly important for women brigin ign povery.
- 56. Strong accountable institutions are essential to ensure that financing is mobilized equitably and spent in ways that support ending women's powerty. State capacity to address women's poverty depends on technical experties, availability and resources, organizational structures and the level of commitment to promoting and decisions by important and influential actors, such as ministries of finance, to allocate resources for the implementation of gender equality laws and policies. There is a

contributes to decent work for women. Public spending on social infrastructure produces positive spillover benefits and enhances productivity of the economy.83

68. A gender-responsive jest transition integrates gender equality and care in positions and programme towards are necessary that work for all people and the planet while upholding rights and the principle of leavings none behind. This transformation meets to open new opportunities and strateging the right properly living in proceed; not proposed invaling in power, in specific areas, such as energy, buildings, food or mobility, "triple-divident" actions can be taken that reduce the ecological footports while is unitariously oreating employment opportunities and facilitating access to goods and services essential to the enjoyment of human rights.

69. To achieve sustainable economies, measures must be taken to ensure that women benefit from the transformation of work, [This includes training women for new jobs, while also recognizing the traditional and local knowledge of Indigenous women, which already plays a key role in strengthening climate action. That approach supports moves towards a more equitable, inclusive world of work.

70. There is growing evidence on the positive role that gender-responsive social protection can play in addressing multimensional power barming women and girls-protection can play in addressing multimensional power barming and protection can be provided by the protection of the pro

7.1. Inclusive, equitable fixed pacts are required to deliver new development strategies for sustainable encomes. These need to support a redistributive global economic system, increase adomestic revenues progressively and increase and diversify public and private investment while ensuring protection and sustainable management of natural resources. The pacts emphasize better alignment of all sources of financing and investment to reduce unment's overvic contributions to the

realization of human rights and the re-establishment of a meaningful social contract.

72. The Secretary-General has called for the delivery of a Sustainable Development
Goal stimulus, 85 which aims to wnlock at least 5500 billion per year in concessional
and non-concessional framate. In addition, the Global Accelerator in 504 and Social
Protection for Just Transitionstife aims to create a minimum of 400 million quality jobs
focused on the erice, distrial and cannel sectors and executed social protection coverage.

#### VII Conclusions and recommendations

73. Realizing gender equality and the rights and empowerment of women and girls is essential for the full, effective and accelerated implementation of the Beijing Declaration and Platform for Action and the 2030 Agenda. Addressing women's and sirls' powerty requires a comprehensive set of sender-responsive policies and

69 Something to think about...

Look for UN projects that work on training women. For instance, the Global Gender and Climate Alliance (GGCA), which involves various UN agencies and partner organizations, works to integrate gender equality into climate charge policies and practices. The alliance supports efforts to train women and recognize their knowledge in Climate action, advocating for inclusive approaches in climate policies.

services, implemented by strengthened institutions and sustained financing from public, private, domestic and international sources. To achieve this, the following actions are required: integrating a gender perspective into commitments on financing for development, operating fiscal space to end poverty, strengthening public institutions for accountability, ensuring the full, equal, effective and meaningful participation of for accountability, ensuring the full, equal, effective and meaningful participation of forestiments of the property of the strength of the property of the forestiments of the property of the strength of the forestiments of the strength of the strength of the forestiments of forestiments

74. To fulfil those objectives, the Commission on the Status of Women may wish to urge Governments and other stakeholders to take the actions set out below.

#### In terms of integrating a gender perspective into financing for development commitments, Governments and other stakeholders should:

(a) Fulfil existing commitments and obligations under the Addis Ababa Action Agends and its follow-up processor intelled to financiary for gender equality and the empowement of women and girls, including: to recommit to adopting and strengthening sound opticies and enforceable legislation and intendermative actions for the promotion of gender equality and women's and girls' empowement at all levels; to ensure women's equal rights, access and opportunities for participation and liadership in the economy; and to eliminate gender-based violence and discinnisation in all its forms:

- (b) Promote and enforce non-discriminatory laws, social infrastructure and policies for sustainable development and enable women's full and equal participation in the economy and their equal access to decision-making processes
- and leadership;
  (c) Increase transparency and equal participation in the budgeting process and promote gender-responsive budgeting.
- (d) Encourage the private sector to contribute to the advancement of gender equality by striving to ensure women's full and productive employment and decent work, equal pay for equal work or work of equal value, and equal cooperunities, and to protection against discrimination and abuse in the
- workplace.

  76. In terms of expanding fiscal space for investments to end poverty for women and sirts. Governments and other stakeholders should:
- (a) Significantly increase resources to address women's and girls' poverty through the mobilization of financial resources from all sources, including public, private, domestic and international, including the scaling up of development finance through the reform of the multilateral development banks:
- (b) Ensure a more effective global financial safety net and access to financing for countries in need;
- (c) Strengthen international tax cooperation to be more inclusive and effective, with a focus on combating tax evasion and avoidance and curbing illicit financial flows:
- (d) Ensure the progressivity of tax policies with a focus on taxing those with the highest ability to pay, including by way of wealth and corporate taxation:
- (e) Increase ODA through mainstreamed and targeted investments for gender equality and the empowerment of women and girls living of poverty:

### 76 Did you know that...

What is fiscal space? Take a look at this brief explanation by the IMF Got Fiscal Space?

- (f) Take concrete steps towards a debt workout mechanism to address sovereign debt restructurings;
- (g) Eliminate conditionalities in debt relief initiatives and debt restructuring packages that can exacerbate gender inequalities:
- (h) Strengthen gender mainstreaming in climate financing and support those women's organizations leading local adaptation and mitigation efforts; and strengthen the consideration of debt sustainability in climate finance, including through the review of debt sustainability frameworks: to inconnecte climate
- vulnerabilities, risks and impacts, and gender and human rights assessments;

  (i) Strengthen standards and regulatory frameworks on the labelling of gender and other thematic bond issuances to ensure that a demonstratable and additive impact is achieved through the issuance;
- Consider measures to reallocate harmful subsidies and tax incentives to pro-poor, gender-responsive policies and programmes.
- In terms of strengthening public institutions for accountability, Governments and other stakeholders should:
- (a) Increase women's representation, leadership and participation in economic institutions to address institutional gender biases and promote gender-responsive, pro-poor economic policy action;
- (b) Strengthen gender analysis in national and local budgetary processes to enable Governments to estimate the costs of and allocate and invest in policies
- and programmes that address women's poverty;
  (c) Foster participation in budget processes through open budgets,
  community and citizen-led monitoring of service delivery.
- (d) Prevent corruption and direct resources to invest in pro-poor public services to strengthen the social contract;
- (e) Enforce core labour standards, including by ensuring minimum wage legislation and equal pay for equal work of equal value;
   (f) Implement policies to support women entrepreneurs and women-
- owned businesses, including by ensuring equal access to finance;

  (a) Increase the authority, operational capacities and resources of national gender equality mechanisms and gender focal points within other public institutions, to support the mainstreaming of a gender perspective into the design, delivery and evaluation of financing policies.
- In terms of engaging and financing women's organizations and collectives, Governments and other stakeholders should:
- (a) Ensure robust and flexible multi-year financing for women's organizations to challenge gender discrimination and biased social norms; promote equality through affirmative action and progressive laws) and empower women and girls
- (b) Ensure local women's rights organizations have adequate resources and capacity to advocate for women's right to work and rights at work:
- (c) Implement policies that ensure the full, effective and meaningful participation of collectives, associations and unions of women workers, both employed and self-employed, in policy and programme design and implementation:

78a Something to think about...

Learn more about women, business, and law 2024 in this report by the World Bank Group Reports, Key Findings - Women, Business and

24-0071 17/18

(d) Support women's collectives and associations that advocate for decent work and the sustainable use of natural resources and that mediate in efforts by women living in poverty to skin access to entitlements and services, to enhance accountability.

In terms of enhancing multidimensional poverty data and statistics,

geographical location and other characteristics:

- (a) Strengthen the capacity of national statistical offices and government institutions to collect, analyse, disseminate and use data on multidimensional poverty, disaggregated by income, sex, age, race, ethnicity, migration status, disability,
- (b) Increase the collection and use of data on social norms and power related to decision-making, which affect resource and consumption patterns, in policy and programme design;
- (C) Strengthen citizen-generated data to shed light on the challenges faced by women living in poverty and strengthen opportunities to use data to demand accountability.
- 80. In terms of fostering new development strategies towards sustainable economies and sustainable societies. Governments and other stakeholders should:
  - ano sustainable societies, Governments and other stakeholders should:

    (a) Ensure that all development strategies comply with the obligations to
- respect, protect and fulfil the human rights of women living in poverty;

  (b) Introduce new metrics beyond gross domestic product to capture the
- value and contribution of unpaid care work to economic and social progress;

  (c) Implement comprehensive, participatory, gender-responsive poverty
- eradication policies that address systemic barriers to ensure an adequate standard of living for women and girls, including through social protection, public services and sustainable infrastructure; (d) Significantly scale up investment in the care economy as a source of
- decent employment that has the potential to narrow gender gaps, and institute measures to ensure that women benefit from the transformation of work towards sustainable economies.
- 81. The Commission may wish to call upon the United Nations system and other international organizations, including international financial institutions, to work collaboratively to support Member States in implementing, measuring and monitoring the aforementioned recommendations at all levels.
